

Névio Costa Magagnin

Full-stack developer

About me

I started studying software development when I was 15 years old with the basics: HTML, CSS and Vanilla JavaScript. Currently I'm 19 years old and I'm looking for a job in a new company that can provide me more challenges in the area.

I love working with web and mobile development, that's why I mastered the React and React Native technology.

Speaking of experience, I started as an intern at Bruning Sistemas in 2020 and after 1 year I was hired as Full-stack developer. After 5 months working as full-stack I received a job offer from Vialaser Serviços Estéticos S.A to work as Front-end developer and since 2021 I have been working with front-end.

For the future, I want to become a Software Engineer and for that, I try to be better every day.
